

JOB POSTING

Prometheus Energy

Title: Plant Operator/Technician

Location: Santa Rosa, New Mexico

Compensation: Competitive salary and benefits

Classification: Exempt, Full-time

Group: Operations

The Plant Operator/Technician will serve as an operator at the Company's planned liquid natural gas (LNG) facility near Santa Rosa, NM. Specific responsibilities will include the following:

- Complete Systems and Facility Operations Training and Certification sessions. Travel may be required for this training.
- Work extended hours or on-call assignments occasionally.
- Work on assigned shifts, which may vary.
- Respond to emergency shut downs as required;
- Be on call to respond to support requests from the Seattle Operations Center.
- Identify components on a piping and instrument diagram (P&ID) and locate them in the field.
- Take direction from an off-site engineer and successfully troubleshoot problems.
- Work with other team members to ensure that the plant is commissioned, started, and operated according to required operating conditions;
- Interface with engineers and designers to provide feedback on lessons learned during installation, commissioning, startup, operations, and service;
- Ensure all company safety procedures are followed in the field during installation and service activities;
- Collect, analyze, interpret, and report on all service data;
- Following plant commissioning activities, conduct daily operation and inspections of facilities;
- Coordinate LNG truck loading;
- Assist Site Supervisor with planning maintenance activities for plant;
- Monitor the plant in a control room environment; and
- Other duties as assigned from time to time.

REQUIREMENTS:

- High school diploma or equivalent.
- Prior experience in process plant operations and maintenance.
- Experience with typical office productivity software systems.
- Experience using human machine interface (HMI) systems.
- Ability to perform without supervision and to think clearly under unexpected circumstances.
- Ability to understand and analyze complex systems.

- Experience using tools to measure and troubleshoot instrumentation, control and power signals.
- High level of comfort working on live equipment.
- Ability to read ladder type electrical schematics and loop diagrams.
- Experience with lockout/tag-out procedures.
- Experience assembling vessel and piping components (e.g. flanges, gaskets, etc.)
- Experience handling gas cylinders and pressure regulators.
- Ability to drive a forklift.
- Reliability and dependability.
- Familiarity with the following:
 - Instrument Air Systems
 - Valve Actuators (Pneumatic, Motorized, Solenoid)
 - Position Feedback Systems
 - Fixed and Variable Speed Motors
 - Heaters
 - Pumps
 - Compressors
 - Vacuum and/or Refrigeration Systems
 - Pressure Relief Valves

Prometheus Energy is committed to equal opportunity employment and does not discriminate on the basis of race, religion, creed, color, national origin, physical disability, veteran status, sex or age.
