

JOB POSTING

Prometheus Energy

Title: Site Supervisor

Location: Santa Rosa, NM

Compensation: Competitive salary and benefits

Classification: Exempt, Full-time

Group: Engineering Group

Company Description:

Prometheus Energy is a vertically integrated, low carbon energy supply company that converts various stranded methane gas sources into high value liquid natural gas (LNG) that is stored, transported and delivered to fleet or industrial customers. Prometheus Energy is growing with the support of its large investment company owners, Shell Technology Ventures Fund and Black River Asset Management.

Role Description:

The Site Supervisor will oversee a team of operators and will coordinate with and assist the General Contractor / Construction Manager during construction, installation and commissioning of a LNG facility located near Santa Rosa, NM. Other responsibilities will include the following:

Typical Responsibilities include:

- Supervise site operators
- Manage scheduling for site operators
- Coordinate all HSSE activities with lead HSSE Engineer to achieve world-class safety and environmental performance
- Work with HSSE Engineer to ensure proper handling and disposal of all waste products
- Perform all plant operation duties (See plant operator job description for details)
- Coordinate trucking logistics with LNG Sales Department
- Manage spare parts inventory, including all consumables
- Manage scheduling of regular plant maintenance activities
- Serve as plant focal point for fire and other safety-related inspections
- Serve as point of contact for local regulatory authorities
- Schedule generator emissions tests and manage service schedule
- Work with contractors to conduct waste water permit sampling including scheduling and report processing

- Ensure compliance of all direct reports with company policies including HSSE and Code of Conduct
- Perform and manage regular site maintenance and “housekeeping” tasks
- Conduct regular operator performance reporting
- Organize and submit monthly report to corporate
- Manage regular site vehicle fleet maintenance
- Interface with source gas supply system operator on shutdowns and operational issues

Requirements:

- Prior experience in process plant operation and maintenance
- Prior supervisory/management experience
- Experience in one or more of the following fields is preferred: Oil & Gas; LNG; Cryogenics/Refrigeration; Gas Processing; Process Plant Operations & Management; Power Generation.
